

FRICTION STIR WELDING is a versatile, proprietary process using state of the art technology which enables stronger, lighter and more efficient welding of aluminum than any previous welding process. Friction Stir Technologies, L.L.C. specializes in the development of friction stir welding applications which expand the use of extruded materials. Friction Stir Technologies, L.L.C.'s mission is to serve as the source for friction stir welding solutions, from concept to final product.

FRICTION STIR WELDING IS ECONOMICAL:

- **NO NEED FOR SPECIAL SURFACE PREPARATION; ELIMINATES MACHINING AND ETCHING.**
- **NO FILLER MATERIALS OR SHIELDING GAS NEEDED.**

Seamer for longitudinal welding of extrusions

- **FRICTION STIR WELDING WELDS IN ANY POSITION USING SINGLE-PASS OR DOUBLE-SIDED.**
- **JOINTS ARE FREE FROM DISTORTION AND POROSITY**
- **NO SPATTER, TOXIC FUMES, OR EXCESS NOISE DURING WELDING**
